Services Marketplace now available on thermofisher.com

Find, quote, buy and manage your scientific services online
in one centralized location

For scientists seeking to accelerate their work by leveraging external expertise and scale, we have extended our digital e-commerce capabilities to establish a services marketplace. This marketplace offers streamlined, self-service access to a large breadth of prequalified services from both Thermo Fisher Scientific and third-party providers.

The Services Marketplace, powered by the Science Exchange™ platform, provides a single, integrated solution to source and engage with thousands of scientific service providers.

With a simplified transaction process, you can easily search, quote, buy and manage your scientific services online.

Step 1

Find

Search for services across a variety of scientific categories by keyword or provider

Step 2

Decide

Get competitive quotes by requesting rates, communicating with providers and comparing services for the offer that best suits your specific project

Step 3

Buy

Order immediately with standardized terms and conditions and easy payment options

Step 4

Manage

Manage your purchases, view quote history, and review and rate providers

Categories in our Services Marketplace

- Agrisciences
- Animal models and studies
- Assays
- Cell biology
- Chemistry and materials
- Clinical research
- Computational modeling
- Data services
- Drug discovery and development
- Engineering and devices
- Environmental and geological services
- Food products and services
- Formulations manufacturing
- Gene synthesis
- Genome editing
- Imaging and spectroscopy
- Laboratory and facility services
- Medical devices and diagnostics
- Pharmacology and toxicology
- Product development and testing
- Project management and consulting services
- Training
- Veterinary research and diagnostic services

This digital, self-service marketplace can help R&D, procurement and manufacturing teams achieve:

- **Productivity and time savings**—removes delays associated with outsourcing by providing rapid access to innovation
- **Direct integration**—seamlessly integrate with procurement systems
- **Organizational efficiency**—consolidate sourcing, contracting and payment processing
- **Risk mitigation**—IT security, data security (SOC 2™ standards) and data privacy featuring Privacy Shield Framework™ protection
