## Peace of mind with automated COVID-19 testing

The Applied Biosystems<sup>™</sup> TaqPath<sup>™</sup> COVID-19 HT Kit is intended for use with the Applied Biosystems<sup>™</sup> MagMAX<sup>™</sup> Viral/Pathogen II Nucleic Acid Isolation Kit, High-Throughput, and is compatible with the Thermo Fisher Scientific<sup>™</sup> Amplitude<sup>™</sup> Platform to enable a high-throughput workflow for the analysis of up to 8,000 COVID-19 specimens in 24 hours. This solution can help laboratories quickly scale COVID-19 diagnostic testing to volumes with the peace of mind of a reliable supply of assays and consumables directly from one supplier.

## **Features include:**

- 20,000 reaction kit to maximise specimen throughput
- Approved for use with upper respiratory specimens (nasopharyngeal and nasal swabs)
- Multi-target design to compensate for emerging SARS-CoV-2 variants and mutations
- Can signal the presence of the S gene 69-70del mutation and, potentially, B.1.1.7 (501Y.V1 or UK variant)
- · Sensitive and specific to increase confidence in results
