## GeneProof *Mycoplasma genitalium/hominis* PCR Kit

### Molecular diagnostic for sexually transmitted infections

#### Broad range of reliable and simple PCR-based testing to help diagnosis

Prompt and early diagnosis of sexually transmitted infections (STIs) is important to enable appropriate treatment and help prevent further transmission. Clinical testing labs require STI testing solutions that help provide confidence, fast turnaround time, and accurate results. The CE-marked Applied Biosystems™

TaqPath™ Menu | GeneProof™ STI portfolio supports sexual health testing and delivers reliable results with excellent sensitivity and specificity. This helps give confidence in screening, diagnostic, and treatment decisions, and helps stop the spread of disease.

#### Applied Biosystems™ TaqPath™ Menu | GeneProof™ *Mycoplasma genitalium/hominis* PCR Kit features:

##### More information with less samples

- Enables you to distinguish *Mycoplasma hominis* from *Mycoplasma genitalium* using a 3-channel system

##### Simple laboratory workflow

- Easily combinable with other PCR kits from the TaqPath Menu | GeneProof STI portfolio in one workflow

##### High sensitivity

- Secured by targeting the multicopy sequence of the 16S rRNA gene of *Mycoplasma genitalium*

##### Contamination reduction

- Ready-to-use Master Mix contains uracil-DNA glycosylase (UNG) and dUTPs reducing carryover contamination

##### Compatible with a wide range of real-time PCR devices
