

VeritiPro Thermal Cycler for HID

Applied Biosystems™ VeritiPro™ Thermal Cycler for HID (Cat. No. A52127)

Thermo Fisher Scientific performed developmental validation experiments in accordance with the DNA Advisory Board (DAB) Quality Assurance Standards (July 2020) and guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM) (December 2016) to evaluate the performance of Applied Biosystems™ PCR amplification kits on this specific instrument model. Thermo Fisher Scientific has validated the instrument-reagent system for use in human identification applications.

Each laboratory using a VeritiPro thermal cycler should perform its own appropriate internal validation studies to establish interpretation criteria and demonstrate that the instrument is appropriate and fit for its own human identification uses.
