Follow these 5 STEPS to Compliance

1. Interpret the Rule
   - Does kiln emit 10 or more TPY of single pollutant, or 25 TPY of a combination of pollutants?
   - Was kiln built after May 6, 2009?

2. Instrument Selection & DAS Integration
   - Precise Hg or HCL monitoring
   - DAS compatible
   - Make room in your plant—one emission monitoring system can take up to 12.84 sq. feet of space!

3. Site Preparation
   - Equipment Arrives
   - Installation: 14 DAYS
   - Run Equipment: 37 DAYS
   - Gather data, validate results, prepare for RATA

4. Service
   - Ensure your system works for long term compliance with appropriate service:
     - Warranties
     - Maintenance
     - Spare Parts
     - Employee Training

5. COMPLIANCE Sept. 1, 2015
