

Polypropylene Horizontal PRO Lamina Clean Bench

TopAir provides high quality, secure Horizontal Laminar Clean Benches. TopAir's clean benches suck air from the room or hall space, transfer the air through a HEPA filter using a fan, and then clean the bench area with filtered air.

In horizontal benches, the filtered air flows through a filter installed at the back of the bench, toward the staff.

All components are manufactured by leading global companies, such as AAF USA.

Advanced Operation System:

- 7" screen with air velocity display
- Automatic configuration for air velocity
- 10-speed fan
- Hour counter for filter
- Filter replacement alarm

The clean bench complies with **Test Standard USA Federal Standard 209E / ISO 14644-1 / CE** and can be customized to customer requirements.

Clean benches are designed to supply a clean controlled work environment meeting Class 100/ISO5 cleanliness standard, resembling a clean room, with the additional advantages of portability and small dimensions.

Clean benches provide a high quality alternative to a clean room at a much lower cost and without massive construction.

- Horizontal air stream producing clean air in compliance with ISO5/ CLASS100 or ISO4/Class10 standards (depending on the filter installed).
- Work surface made of 304 stainless steel
- Side windows made of tempered glass
- 7" screen with air velocity display
- Automatic configuration for air velocity
- High efficiency quiet EC fan
- Metal stand
- Front window
- UV light
- Universal electrical outlet
- Eco-friendly, cost-effective LED lighting
- **Compliance with Test Standard: US Federal Standard 209E / ISO 14644-1 / CE**
