**p504s (Clone 13H4)**

Rabbit Monoclonal Antibody

Cat. # RM-9130-A0, -A1, or -A (0.1ml, 0.5ml, or 1.0ml) (Purified with BSA and Azide)

Cat. # RM-9130-R7 (7.0ml) (Ready-to-Use for Immunohistochemical Staining)

Cat. # RM-9130-PCS (5 Slides) (Positive Control for Histology)

**Comments:** Alpha methylacyl-CoA-racemase (AMACR), also known as p504s is an enzyme involved in the metabolism of branched-chain fatty acids. p504s is expressed in various normal tissues and carcinomas, while it is overexpressed over 30-fold in prostate carcinoma compared to benign glandular tissues.

**Mol. Wt. of Antigen:** estimated at ~45kDa

**Species Reactivity:** Must be determined by the investigator.

**Clone Designation:** 13H4

**Ig Isotype / Light Chain:** IgG

**Immunogen:** Human AMACR polypeptide.

**Applications and Suggested Dilutions:** Analyte Specific Reagent. Analytical and performance characteristics are not established. Optimal dilutions must be established by the investigator.

**Positive Control:** Must be determined by the investigator.

**Cellular Localization:** Must be determined by the investigator.

**Supplied As:** Purified antibody diluted in 10mM PBS, pH 7.4, with 0.2% BSA and 0.09% sodium azide.

or

Prediluted antibody which is ready-to-use for staining of formalin-fixed, paraffin-embedded tissues.

**Storage and Stability:** Ab with sodium azide is stable for 24 months when stored at 2-8°C.

**Limitations and Warranty:**

This product is an Analyte Specific Reagent. Analytical and performance characteristics are not established. The use of this reagent is restricted to clinical laboratories certified to perform high complexity testing under CLIA 88 regulations. Each laboratory must validate the product for its own use. This product is not intended for therapeutic procedures. No claims are made or implied about the diagnostic value of this product. No products are to be construed as a recommendation for use in violation of any patents. We make no representations, warranties or assurances as to the accuracy or completeness of information provided on our data sheets and website. Our warranty is limited to the actual price paid for the product. NeoMarkers is not liable for any property damage, personal injury, time or effort or economic loss caused by our products.

**Material Safety Data:**

This product is not licensed or approved for administration to humans or to animals other than the experimental animals. Standard Laboratory Practices should be followed when handling this material. The chemical, physical, and toxicological properties of this material have not been thoroughly investigated. Appropriate measures should be taken to avoid skin and eye contact, inhalation, and ingestion. The material contains 0.09% sodium azide as a preservative. Although the quantity of azide is very small, appropriate care should be taken when handling this material as indicated above. The National Institute of Occupational Safety and Health has issued a bulletin citing the potential explosion hazard due to the reaction of sodium azide with copper, lead, brass, or solder in the plumbing systems. Sodium azide forms hydrazoic acid in acidic conditions and should be discarded in a large volume of running water to avoid deposits forming in metal drainage pipes.
