

# GeneArt Instant Designer vector onboarding

## Free vector onboarding with your GeneArt Instant Designer order\*

Don't see a suitable vector in the ordering portal? Send us your unique vector to store at our facility and make available in the Invitrogen™ GeneArt™ Instant Designer online portal for your gene synthesis cloning orders.

### Why should you onboard your unique vector?

- Saves you time—we subclone for you
- Receive future clones ready to use in your unique vector
- Confidential—your vector is only available to you and no one else

To initiate onboarding for one or more vectors, please email [geneartsupport@thermofisher.com](mailto:geneartsupport@thermofisher.com) with the subject line “GeneArt Instant Designer vector onboarding promo.”

### Provide the following information:

- Vector sequence as .gb file
- Vector name (15 characters max)
- Resistance marker
- Vector copy number
- Email address
- Username for [thermofisher.com](https://thermofisher.com)
- If you want to share your vector with other end users, please provide full names and email addresses
- A maximum of 10 vectors may be submitted at once

Within 3 business days, we will email a notification that your vector is in your GeneArt Instant Designer portal account, ready for ordering.

After you submit your order, we will email you instructions for shipping us the vector to archive it with GeneArt.

### Do we already have your vector?

If you have previously sent your vector to us but it's not available in the GeneArt Instant Designer portal for selection, send a request to [geneartsupport@thermofisher.com](mailto:geneartsupport@thermofisher.com) with the subject line “Enable existing vector in GeneArt Instant Designer portal.”

### Provide the following information:

- Vector sequence as .gb file
- Vector name (15 characters max)
- Resistance marker
- Vector copy number
- Email address
- Username for [thermofisher.com](https://thermofisher.com)

Within 3 business days, we will email a notification that your vector is loaded in the GeneArt Instant Designer portal for ordering.
