

Get your lab up and running with the Jump Start New Lab Program

With so many factors to consider:

Finite resources

Time constraints

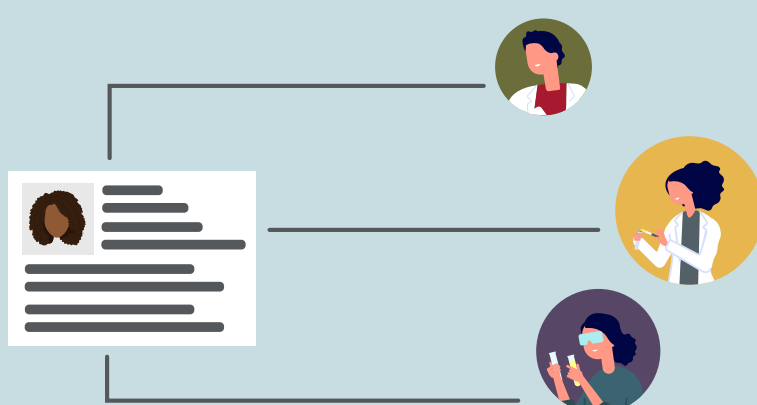

Lack of expertise

Thermo Fisher Scientific makes it easy to “jump start” your new lab or lab expansion in 3 simple steps:

STEP 1 Identify your goals

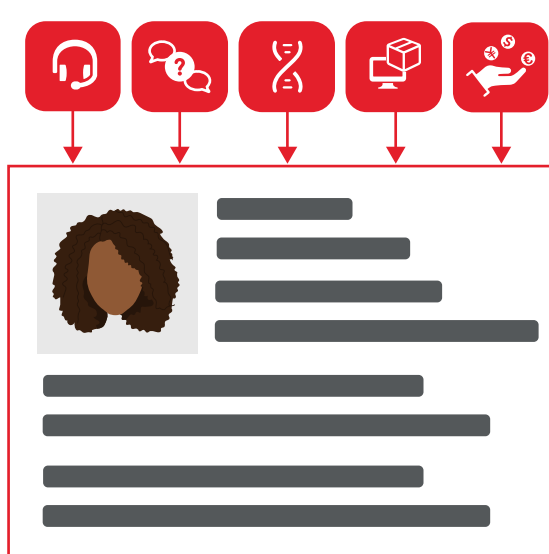

We'll ask you for some basic information about your needs so we can match you with the right team members.

STEP 2 Personalize your lab

Working directly with you, we'll conduct a full needs evaluation and discuss different strategies to reach your goals, such as:

- A product and workflow consultation
- Exclusive discounts and/or flexible finance options
- Personalized lab design support using 3D software
- On-site or virtual product demos
- Regulatory guidance and support

STEP 3 Prepare for launch

It's time to get to work. Our experts will guide you through workflow requirements based on your needs and timeline.

Resources can include:

- Hands-on classroom training
- Our SmartStart™ orientation
- On-demand eLearning

With the Jump Start New Lab Program, you'll get:

- Ongoing remote support
- Access to our technical application specialist team
- Proactive preventive maintenance scheduling
