5 Reasons to use Process Mass Spectrometry in Flare Stack Emission Monitoring

1. Measure flare gas & process streams with a single analyzer – full stream composition in 30 seconds or less.

3. Linearity superior to gas chromatography. Prima PRO scanning magnetic sector MS, performance verified by accredited laboratory Effectech.

4. Optimization on a per-stream basis of an unlimited number of analysis methods with GasWorks® Software.

5. Proven availability >99% with 6 monthly automated calibration methods. #1 world’s market leading process MS.
