

5 Reasons to Use Process Mass Spectrometry for Ammonia Monitoring

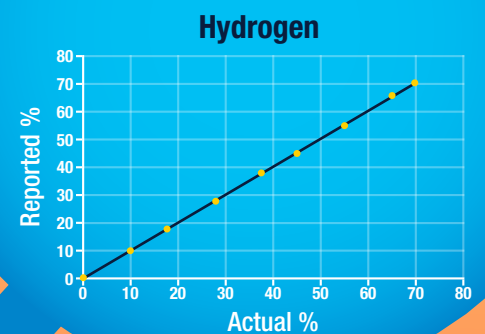

Ammonia production

1 Measure
every step of a process.

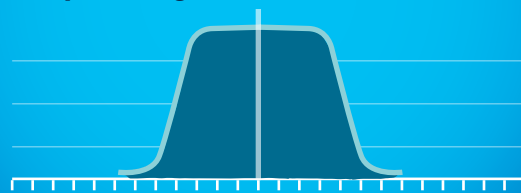

2 Linearity
superior to gas chromatography. Prima PRO scanning magnetic sector MS performance verified by accredited laboratory Effectech.

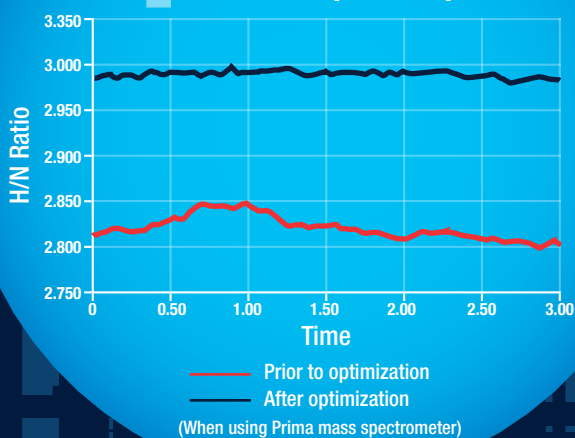

3 Optimization
on a per-stream basis of an unlimited number of analysis methods with GasWorks® Software.

peak height = concentration %

4 Precision
to enhance control of ammonia product processes.

5 Proven
availability >99% with 6 monthly automated calibration methods. #1 world's market leading process MS.
