

Quality controls

Thermo Scientific™ Auto-Connectivity software

Say goodbye to manual data entry

Gain real-time access to internal and peer data with Auto-Connectivity software for Thermo Scientific LabLink xL™ quality control software. Automatically capture quality control (QC) data directly from your instruments for fast access to performance metrics.

**Hands-free
and real-time**

Enables instant, fully automated QC data transfers from your instruments to LabLink xL QC software, eliminating manual entry and boosting your lab's productivity and reliability.

**Minimal setup
and integration**

Auto-Connectivity software can be set up within hours, seamlessly integrating with most clinical instruments and existing lab IT configurations.

**Results-based
troubleshooting**

Immediate access to internal and global peer comparison data ensures faster decisions and troubleshooting, driven by real-time performance metrics.

Transform your lab with auto-connectivity

Thermo Fisher's Auto-Connectivity solution is revolutionizing laboratory operations by delivering enhanced efficiency, accuracy, and ease of use.

Do more, with less steps

More confidence. Automation reduces the risk of human error in data entry, ensuring consistency and data integrity for reliable and accurate results

Increase productivity. Automated data transfers streamline business processes, freeing up valuable time for laboratory staff to engage in more critical activities

Cost reduction. By minimizing manual steps and reducing errors, laboratories can save on labor costs and avoid the expenses associated with data correction and rework

Reliable, real-time insights

Instant access. Auto-Connectivity software ensures immediate access to both internal and peer data, enabling swift data-driven decisions

Faster troubleshooting. With peer comparison data, laboratories can access critical performance metrics such as Westgard Rules and Sigma Score, enabling faster troubleshooting and more reliable QC results

Easy setup and expansion

Quick setup. Installation specialists ensure easy setup within a few hours

Easy integration. Compatibility with a wide range of lab instruments and existing lab IT configurations supports seamless integration into your lab workflows

Scalability. Auto-Connectivity software scales with your laboratory's growth, accommodating additional data points and more instruments. Add new instruments or QC products easily with our intuitive software interface
