Thermo Scientific MAM 2.0
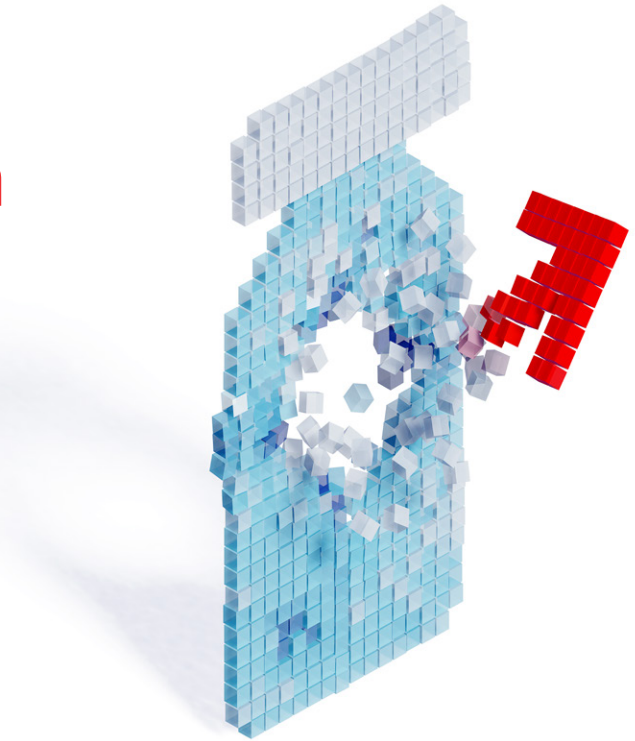

Straight through to breakthrough

There has been a dramatic paradigm shift to how the world thinks about making a drug. The race is on to find new ways of developing safe and efficacious drugs, like biotherapeutics, faster. Thermo Scientific MAM 2.0 is the industry's only comprehensive, end-to-end Multi-Attribute Method (MAM) solution with a fully connected, compliance-ready ecosystem for seamless knowledge sharing on a global scale.

Created to take the promise of MAM even further, MAM 2.0 breaks down the barriers to implementation. It includes hardware and software tailor-made for development and QC to provide consistent and reproducible high-quality results. It also includes consultation, installation, training and ongoing support; everything you need to bring your next biotherapeutic candidate straight through to breakthrough.
