

## Vials and well plates portfolio

# SureSTART collection

Streamlined choice. Trusted quality.

## For best results, start your analysis off right

The best analysis starts with the right workflow products. Using our new Thermo Scientific™ SureSTART™ vials and well plates, your valuable samples have the sample security and integrity they need to deliver excellent results. Available in three different performance levels, you will find it easy to select products best suited to your analytical, performance or value needs. What's more, you'll have full confidence that every SureSTART product meets specification –ensuring there's no weak link in your workflow.

## New name. New consolidated benefits.

The refreshed Thermo Scientific SureSTART sample handling collection includes a range of sample storage and analytical vials and well plates previously sold under legacy brands Thermo Scientific™ National Scientific™, Thermo Scientific™ Chromacol™ and Thermo Scientific™ Sun-SRI™.

All these products are now absorbed into one portfolio so we can deliver a first class product experience to our customers from the moment you start your purchasing journey, to provide you with performance, instrument compatibility, affordability and delivery that you need.

We understand that not every experiment or analyte is the same, and that you need products that can meet your performance and pricing requirements. You can now find three different waves on each of our glass vials (to indicate which performance level they belong to)—and a write-on patch that comes as standard.

Making it easier for the analysts to select the right product and have it labeled correctly right from the start.

With the new SureSTART Collection, we ensure that no HPLC/UHPLC, GC or MS system gets left behind. Our vials and well plates are suitable for all vendors instruments. Simplifying your stockroom—and your budget.

Five main benefits to you		Click on each to learn more about each of these benefits
	<b>Assured quality and performance</b>	 Thermo Scientific SureSTART. Assured quality and performance
	<b>Instrument compatibility</b>	● Thermo Scientific SureSTART. Instrument compatibility
	<b>Sample security and low compound adsorption</b>	● Thermo Scientific SureSTART. Sample security and low compound adsorption
