solutions

2018 Proteomics Seminar Tour

May 17 • Bethesda, MD • National Institutes of Health •
Building 35 A, Room GE650 • 35A Convent Drive

Join us for the day and learn about exciting advances and applications in proteomics.

Thermo Fisher Scientific™ is a leader in the life sciences, providing innovative, systems-wide proteomics MS solutions to address the challenges of biological research.

Agenda

9:00 a.m. – Registration and Continental Breakfast

9:30 a.m. – Welcome and Introductions

9:40 a.m. – Systems-level Omics Integration of Proteomics and Metabolomics using Orbitrap-based Mass Spectrometry

10:20 a.m. – Wide and Deep: New Reagents and Workflows for Multiplexed Quantification of the Phospho Proteome and Plasma Proteome

11:00 a.m. – Coffee Break

11:20 a.m. – Go Beyond with your Quan: Innovations in Hardware and Workflows for Label-free Protein Quantitation

12:00 p.m. – Lunch

1:00 p.m. – Increasing the Plasma Profiling Capabilities for Precision Medicine

1:40 p.m. – Structural Analysis by Cryo-EM: The Revolution will not be Crystallized

2:20 p.m. – Expanding the Biomolecular Structural Analysis Capabilities using Orbitrap Technology

3:00 p.m. – Wrap-up and Adjourn
