

## **Aldrich FT-IR Collection Edition II**

*Library Listing – 18,454 spectra*

This library represents the most comprehensive collection of FT-IR spectral references available. It contains the most common chemicals found in the Aldrich Handbook of Fine Chemicals.

The Aldrich Collection of FT-IR Spectra Edition II library contains spectra of 18,454 pure compounds and comes with the Second Edition of the Aldrich Library of FT-IR Spectra (a 3-volume book set). All spectra were acquired by Sigma-Aldrich Co. and were processed by Thermo Fisher Scientific. This library represents the largest collection of spectra collected entirely by FT-IR instrumentation. Eight smaller Aldrich Material Specific Sub-Libraries are also available.
