

The world leader in serving science

Complete **CANNABIS**
TESTING SOLUTIONS
for the Canadian market
from one trusted source

ThermoFisher
SCIENTIFIC

More solutions to meet regulatory guidelines

Canada's legalization of cannabis creates new challenges and opportunities for today's testing laboratories. Government labs, contract labs and even licensed producers need a proven, reliable way to control quality, validate safety and mitigate potential risks of heavy metals and bacteria.

Offering a full breadth of solutions, we are your partner of choice.

The world's most complete end-to-end workflow solutions

All from one trusted source

Offering one of the broadest portfolios of cannabis testing equipment for the Canadian cannabis market, we are your one-stop resource for customized solutions, proven workflows and support. Whether setting up your first laboratory or scaling existing operations, we offer a complete range of instrument workflows to help you comply with Canadian cannabis testing regulations.

Your one-stop resource for...

A comprehensive portfolio—No other provider can match our complete line up of diverse technologies for Canada's emerging cannabis market.

Sourcing simplicity—From instruments and workflows, to consumables and software, we can meet your needs.

Streamlined ordering, installation and setup—Partnering with a single provider saves time and streamlines your installation process, so you are up and running sooner.

Productivity and efficiency—Tap into experienced customer service, knowledgeable sales representatives, specialized chemical services, and responsive instrument service and asset management.

New lab start-up program—Let us help you get started quickly and easily, with everything you need to equip and supply your labs with financing options available.

Proven expertise and guidance—We are working with Canadian collaborator laboratories to improve sample prep tools and innovate application methods, so you can turn to us for complete solutions and expertise.

A commitment to public safety—We can support government stakeholders, regulators and licensed operators in Canada with analytical testing solutions for cannabis safety testing and research.

Results

World-leading technologies. One complete workflow solution.

We deliver the widest range of analytical technologies and laboratory workflow solutions to help you establish Good Production Practices and comply with Health Canada regulations for cannabis quality and safety testing:

Quantification, Unknowns and Screening

Microbial Culture Products and Plate Media

Targeted Volatile Pesticides and Terpenes

Analytical Software Solutions

Routine Targeted Pesticides Analysis

Chromatography Data System (CDS)

Multi-Element Analysis

Columns and Consumables

Workflow Solution for Unknown Contaminants

Platform for Science Software Solutions

Genomic and Microbial Profiling/Strain and Sex Determination

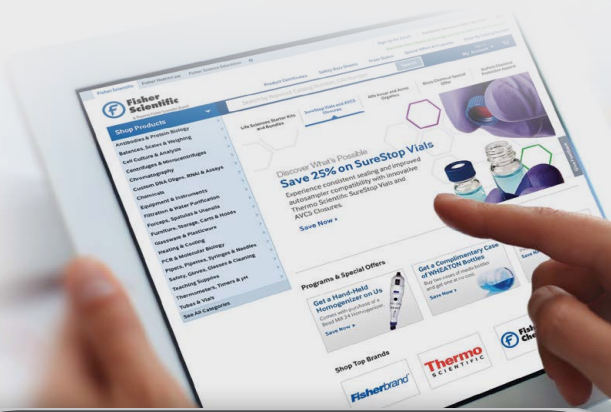

Foreign Materials Detection

Shop Fisher Scientific

- Experienced customer service
- Dedicated sales representatives
- Specialized chemical services
- Instrument service and asset management
- New lab start-up program
- Financing options available

With over 2.5 million products, Fisher Scientific has the most comprehensive offering of supplies and services that help your laboratory maintain compliance and increase productivity and efficiency. Visit us at www.fishersci.com.
