

Five years of the Thermo Scientific Vanquish UHPLC Platform

In the summer of 2014, Thermo Fisher Scientific revolutionized liquid chromatography with the launch of the Thermo Scientific™ Vanquish™ Horizon UHPLC system. Since then, the Vanquish UHPLC platform has continued to push the boundaries in separations and offers the most advanced UHPLC instruments available.

VANQUISH

Thermo Scientific™ Vanquish™ Platform

- Biocompatibility by design
- Comprehensive portfolio options designed to meet the needs of your laboratory
- Wide portfolio of detection technologies

2014

Thermo Scientific™ Vanquish™ Horizon UHPLC System

- For advanced research and sample characterization
- Industry-leading detector sensitivity and linearity
- For maximum resolution, high throughput and exceptional LC-MS performance

2015

Thermo Scientific™ Vanquish™ Charged Aerosol Detectors

- Unique technology for near universal detection
- Uniform response independent of analyte structure
- Complementary detection for nonchromophoric compounds

2015

Thermo Scientific™ Vanquish™ Flex UHPLC Systems

- Flexibility to accommodate HPLC and UHPLC methods
- Ideally suited for method development and biopharmaceutical characterization
- Binary and quaternary options

2018

Thermo Scientific™ Vanquish™ Duo UHPLC System

- Double productivity with Dual LC workflow utilizing the unique dual sampler
- Maximize MS utilization for higher sample throughput with dedicated workflows
- Uniform response with charged aerosol detection under gradient elution with Inverse Gradient workflow

The collective power of chromatography

LC that takes your productivity to new heights

Laboratories are constantly asked to do more with less. Built from the ground up, Thermo Scientific™ HPLC and UHPLC instruments enable you to raise your productivity to the next level and give you confidence in your results. Time and cost associated with staff training are minimized allowing your laboratory to meet ever-increasing productivity demands, making it faster to bring products to market. With the largest portfolio of LC solutions, we remain a steadfast and committed partner in your endeavor to improve the world around us.
