Background

Demo data for aneuploidy ReproSeq PGS workflows in IonReporter, exists in all IonReporter accounts. CNV Loss (1N) on Chromosome 13 and CNV Gains (3N) on both Chromosomes 14 and 15, on an apparently male sample. Zoom-in view on selected Chromosome 13

Whole Genome View

Analysis 1, proband: Demo Aneuploidy_c6632_2023-04-13-12-38-24-267, Demo Aneuploidy

Easily distinguish aneuploid events with colors noting gains and losses from the standard baseline copy number (2).

Highlight specific chromosomes to look at smaller microdeletions and duplications.
