

HID Real-Time PCR Analysis Software v1.4 for Human Identification

Cat. Nos. A78901, A78902

Thermo Fisher Scientific performed verification studies in accordance with the Quality Assurance Standards (QAS) for Forensic DNA Testing Laboratories (July 1, 2020) to evaluate the Applied Biosystems™ QuantStudio™ 5 Real-Time PCR System with HID Real-Time PCR Analysis Software v1.4 for use in forensic applications using the Applied Biosystems™ Quantifiler™ Human Plus (HP), Quantifiler™ Trio, Quantifiler™ Duo, and Quantifiler™ Human DNA Quantification Kits. The HID Real-Time PCR Analysis Software v1.4 for Human Identification has been verified for use in human identification testing for database, forensic casework, and paternity applications pursuant to the above guidelines.

Please note that customers should perform their own internal studies to establish interpretation criteria and demonstrate that the QuantStudio 5 Real-Time PCR System with HID Real-Time PCR Analysis Software v1.4 is appropriate and fit for their forensic use.
