

# NGM Detect PCR Amplification Kit

Cat. No. A31832

Thermo Fisher Scientific performed developmental validation experiments in accordance with the DNA Advisory Board (DAB) Quality Assurance Standards (September 1, 2011) and guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM, December 2016) to evaluate the performance of the Applied Biosystems™ NGM Detect™ PCR Amplification Kit. Thermo Fisher Scientific has validated the kit for use in human identification testing.

Each laboratory using the NGM Detect PCR Amplification Kit should perform its own appropriate internal validation studies to establish interpretation criteria and demonstrate that the NGM Detect PCR Amplification Kit is appropriate and fit for its own human identification uses.
