Animal health solutions 2022
A comprehensive portfolio of quality products to meet your needs
Test consistently and confidently during outbreaks with the largest offering of high-quality molecular solutions

As farm animal disease strains evolve and variants mutate, you can rest assured that you’ll have reliable access to leading-edge Applied Biosystems™ testing solutions—many of which are regulated and globally certified.

 Equip your lab with products designed with input from customers to improve and streamline testing so you can deliver for your customers when it counts.
Contents

Sample extraction 4
Ruminant 6
Porcine 9
Avian and aquaculture 11
Instruments 12

Build your complete veterinary diagnostic workflow quickly and easily from one site with our product selection tool. In three easy steps, use our product selection tool to build complete, validated workflows, comprised of proven Applied Biosystems products. Save time, money, and resources, and stay focused on your work instead of assembling your workflow.

Try our easy-to-use product selection tool

From outbreaks of *Mycoplasma bovis* to African swine fever, 100+ Applied Biosystems products are available to meet the challenge. Our animal health diagnostics solutions are built on a foundation of proven performance and innovation for the future. They combine decades of research investment and industry expertise—global and local—into robust, cutting-edge offerings from the world leader in serving science.
