DeviceLink system for TSX Series ultralow temperature (ULT) freezers

Temperature monitoring comes standard on TSX Series ULT freezers

- The Thermo Scientific[™] DeviceLink[™] system is a builtin capability of your laboratory equipment that enables a Wi-Fi–based connection to transmit equipment data*
- The InstrumentConnect app is the cloud-based platform enabling real-time monitoring of the data transmitted by the DeviceLink system

ULT monitoring and alarms

ULT freezers have built-in sensors that monitor a variety of system components, including compressors, evaporators, ambient, and internal cabinet temperature. This information is used by the freezer to detect system issues and to

Monitoring points:

- Cabinet temperature
- Ambient temperature
- Setpoints

trigger an alarm when necessary. These monitoring points come standard on Thermo Scientific[™] TSX Series ULT freezers.

- Alarms/notifications:
- Warm and cold
- Door open
- Power failure/wrong power
- Refrigeration system failure
- Main/backup system
 probe failures
- Main/backup system battery disconnected
- Main/backup system lost communications
- Water flow rate (watercooled ULT only)

Maintain your focus and peace of mind with the DeviceLink system and the InstrumentConnect app.

* DeviceLink system Wi-Fi technology not available in all countries/regions.

Connecting a ULT to your InstrumentConnect account:

There is no restriction on the number of users who can connect to a single ULT freezer.

Step 1: Create an InstrumentConnect account (and download the InstrumentConnect app, if desired).

Step 2: Go to the user interface on the ULT freezer.

Step 4: Connect through either option below: Connect via Mobile Device, or Passcode (web application).

Step 5: Follow the on-screen prompts to complete setup.

More connection information can be found in the TSX ULT user manual. Find your user manual at **thermofisher.com/usermanuals**.

DeviceLink system requirements/specifications:

- Wi-Fi protocol: 2.4 GHz; IEEE 802.11B, IEEE802.11G, IEEE 802.11N
- Wi-Fi SSID: Must be identified under network scan (can't be a hidden connection)
- Firewall ports: 123 and 443
- Wi-Fi range: Up to 30 meters
- Wi-Fi security: WPA2PSK (general home/personal), WPA2PEAP (enterprise; certificate validation is supported)

• Password compatibility: Use of ASCII pre-shared keys (8-63 ASCII Characters)
