

# CEMS Recommissioning

## Thermo Scientific Mercury Freedom System

As the original equipment manufacturer, you have our commitment that we will provide the highest quality of service when recommissioning your Mercury Freedom<sup>®</sup> System. Our Field Service organization is equipped with the tools and training needed to get you up and running.

### • Program Details:

- **Systems Evaluation & Budget Development** to help identify current monitoring capacity, health and next steps to achieve compliance monitoring goals.
- **Installation & Start-up** to restore, revitalize and recommission existing CEMS with the most cost-effective solutions available.
- **Instrument Calibration Services** for optimal instrument and data reporting compliance.
- **Dedicated Parts Warehouse Program.** Our investment for both your planned and unplanned systems support.
- **Systems Monitoring Solutions**, on-site and remote dial-up, available at your convenience and at your time of need.
- **Preventative Maintenance Service** in a variety of partnership options.
- **Professional Operations, Maintenance and Applications Training** designed to meet your technical requirements.

**Are you ready to start monitoring for mercury?**

Get started by contacting your local Thermo Fisher Scientific representative or visit our website at [www.thermoscientific.com/mercury](http://www.thermoscientific.com/mercury).
