49i Series Zero Air Setup Technical Bulletin

Bulletin # 49i-ZA.01

Rev 01/2016

The zero air option is a convenient system for generating pollutant free zero gas for ozone monitoring requirements. This option includes a pump, filter, filter holder, charcoal canister and silastic tubing.

The purpose of this technical bulletin is to inform 49i Series customers how to connect the zero air option including charcoal canister, external pump with relief valve and inline particulate filter and tubing.
