

Spend less time western blotting

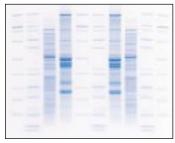

8:25 am Start

Run gels in 35 minutes

using NuPAGE® Novex Gels:

- 35-minute run time
- One-year shelf life
- Excellent resolution
- Efficient transfers

NuPAGE® Novex 4-12% Bis-Tris Gel

9:00 am

Transfer gels in 1 hour

using the **XCell II**[™] **Blot Module**, which slips easily into the XCell *SureLock*[™] Mini-Cell:

- Fast transfer times
- Simple set-up
- Never leaks
- Even transfers

XCell II[™] Blot Module

10:00 am

Detect proteins in 3 hours

using the WesternBreeze® Kits for Chromogenic or Chemiluminescent detection:

- Fast, easy-to-use
- Low background
- High sensitivity and long-lasting signals
- Anti-Mouse, Anti-Rabbit, and Anti-Goat Kits available

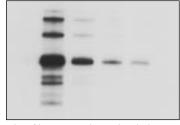

WesternBreeze® Immunodetection Kit

1:00 pm Finish

Get great results in just 5 hours!

Blot of human IgG detected with the WesternBreeze® Chemiluminescent Kit

NuPAGE® Novex 4-12% Bis-Tris Gel run w/MES SDS Buffer (35-minute run time)

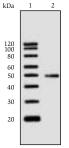

NuPAGE® Pre-Cast Gels

Reliable, high-performance protein separations

NuPAGE® pre-cast gels take SDS-PAGE to the next level with a patented neutral pH electrophoresis system that offers significant advantages over traditional SDS-PAGE buffer systems. With NuPAGE® gels you'll get:

- 12-month shelf life
- Accurate results time after time
- Excellent transfer efficiency
- Fastest run time

Chemiluminescent Chromogenic Detection Detection

Sharp bands of MagicMark[™] standard detected simultaneously with target protein on western blots

Lane 1: 5 µl of MagicMark™ standard

Lane 2: 2 ng of protein

MagicMark™ Western Protein Standard

For easy and accurate western blot analysis

MagicMark[™] standard lets you visualize standard bands simultaneously with your target protein using the same protocol. Get sharp bands and precise molecular weight estimation directly on blots. MagicMark[™] standard offers:

- Direct visualization of standard bands
- Accurate molecular weight estimation
- · Convenient, ready-to-use format

Pre-Cut Membrane/Filter Paper

The only pre-cut membrane/filter paper sandwiches for simplifying blotting

The Novex® pre-cut, pre-assembled membrane/filter paper sandwiches make setting up blotting procedures easy and convenient. The pre-cut membrane offers:

- Pre-cut membrane/filter paper that perfectly fit Novex® mini-gels
- Convenient assembly of the gel for blotting
- Nitrocellulose, PVDF, or nylon membranes to meet your needs

WesternBreeze® ECL ECL Plus 1 2 3 1 2 3

A 53 kD protein containing a V5 epitope was separated on a NuPAGE* 4-12% gel then transferred to a Novex* PVDF membrane. Blots were probed with the Anti-V5 Antibody and detected with anti-mouse versions of the indicated system. Blots were exposed for 2 minutes on the same piece of film.

Lane 1: 20 ng protein Lane 2: 2 ng protein Lane 3: 200 pg protein

WesternBreeze® Immunodetection Kits

The fast and easy-to-use western blot detection

The WesternBreeze® Kits provide a complete set of reagents for ultrasensitive detection of primary antibodies immobilized on nitrocellulose or PVDF membranes. Develop with your choice of either a chromogenic or chemiluminescent substrate. WesternBreeze® Kit offers:

- Low background and strong, long-lasting signals
- Complete detection kit-everything is included but your membrane and primary antibody
- One simple, easy protocol
- · Ready-to-use reagents

The XCell SureLock" Mini-Cell is covered under U.S. Patent No. 6,001,233. The NuPAGE* System is covered under U.S. Patent Nos. 6,059,948, 5,578,180, 5,922,185, EP0753142 and corresponding patents in other countries. For research purposes only.
