

2D Labtainer BioProcess Container (BPC) systems

Small-volume liquid handling systems for cell culture and bioprocessing

Thermo Scientific™ Labtainer™ BioProcess Containers (BPCs) effectively address small-volume liquid handling needs. They range in size from 50 mL to 50 L, with a variety of standard configurations to meet most application needs. These Labtainer BPCs are space saving, ergonomic, and constructed of Thermo Scientific™ Aegis™ 5-14 and CX5-14 films. Product configurations cover a range of industry-standard connection systems; handling systems are available for transport and storage.

Standard products

Standard Labtainer BPCs are stocked for immediate delivery and are fully supported by our process and product validation program. (For more information on our validation program, please refer to our validation guides on Aegis5-14 and CX5-14 films. Additionally, standard Labtainer BPCs have validated liquid shipping configurations.)

Standard configurations can be customized for optimal fit, form, and function using the one of the industry's largest libraries of qualified components to address process-specific applications.

Whether in a standard or customized configuration, Labtainer BPCs are ideal for:

- Dispensing, packaging, and storing cell culture media, buffers, and process liquids
- Delivery of cell culture media or process liquids to small-scale bioproduction systems
- Bioreactor and fermentation feed, sampling, and harvest
- Chromatography feed and fraction collection
- Storage and transport of bulk intermediate products, process intermediates, vaccine conjugates, and other biological products

Aegis5-14 and CX5-14 chamber details

50 mL–2 L: Polyethylene ports are welded into the BPC seam, 2 x 1/4 in. ID ports on standard chamber.

50 mL–2 L, 2-port Labtainer

2 L–50 L: Polyethylene ports are welded into the BPC seam, 2 x 3/8 in. and 1 x 1/4 in. ID ports on standard chamber.

2 L–50 L, 3-port Labtainer

versaCART mobile accessory cart

Quickly configure and organize your fluid processing systems on the Thermo Scientific™ versaCART™ unit and maximize valuable cleanroom space and resources. The modular design of the versaCART unit allows users to quickly custom-configure single-use solutions for multiple biomanufacturing steps.

The slim design and ergonomic structure maximize floor space without compromising usefulness. Since the versaCART unit enables users to have required components and equipment on board, assignments are completed quickly and efficiently.

Description	Dimensions (H x D x W)	Weight (cart only)	Material
Cart only	89 x 69 x 142 cm (35 x 27 x 56 in.)	57 kg (125 lb)	304L stainless steel
Cart and 200 L storage drum	89 x 69 x 142 cm (35 x 27 x 56 in.)	64 kg (140 lb)	304L stainless steel polyethylene drum
Cart with 3 pivoting shelves	89 x 69 x 142 cm (35 x 27 x 56 in.)	111 kg (245 lb)	304L stainless steel
