

get more stability

Model 83i Mercury Probe

We know how important stability and reliability are when monitoring for compliance. That's why we continue to develop and find innovative ways to offer you the most effective and easy-to-use solutions. The Thermo Scientific™ Model 83i Mercury Probe is the ideal solution given its low maintenance and conversion of mercury at the stack. We'll even help you transition to the Model 83i probe. Send us your Eligible*** Probe Model 83i-GC and we'll give you a credit** towards the purchase of a new Qualifying* Mercury Probe.

Trade in your existing model 83i-GC probe, get a credit towards a new Mercury probe.

• [Contact your local representative for more details.](#)

Designed to meet your needs

Designed to meet the provisions of 40 CFR Parts 60 and 75, the Thermo Scientific Mercury Freedom System including the Model 83i-HX provides a complete mercury monitoring solution that measures elemental, ionic, and total mercury in exhaust stacks from both coal-fired boilers and waste incinerators.

Model 83i Mercury Probe Advantages:

- Dilution system for wet basis measurement
- High flow inertial filter to reduce particulate matter contamination
- Glass coated components to prevent reactions with mercury
- Conversion at the stack to prevent loss of elemental mercury
- Proprietary dry converter/scrubber requires no wet chemistry or water supply

Trade-In details:

Credit only applicable to sales made within the United States pursuant to a binding purchase order received on or before December 31, 2014. Credits shall not apply towards previously purchased probes. Offer ends December 31, 2014. Eligible probes must be received within 60-days of Qualifying probe shipment date. You may only trade-in one Eligible*** Probe for each Qualifying* Probe you purchase. By returning an Eligible Probe, you acknowledge and agree that (1) you are selling the Eligible Probe in consideration of the value of the credit issued in respect thereof; (2) by accepting such credit, you are giving up full ownership rights to the Eligible Probe; (3) the used Eligible Probe will not be eligible for return; (4) you are responsible for removal of all confidential information before relinquishment of the Eligible Probe; (5) you are responsible for deactivating the Eligible Probe and ensuring you retire any outstanding obligations you may have to any person regarding the Eligible Probe and (6) Thermo Environmental Instruments Inc. makes no representation or warranty concerning the limited assessment of your equipment or probe provided in connection with the program contemplated hereby and shall have no liability whatsoever in respect thereof.

Contact your local representative or service team member for more details.

For more information on how to participate in this program please call your local Thermo Fisher Scientific Sales Representative at 1-508-520-0430 or toll free at 1-866-282-0430.

Customer Notice only. Distributors and Sales Reps should contact their local Sales Manager for details and are not eligible for this offer.

* "Qualifying Probe" means a new Thermo Scientific Model 83i (HX) Mercury Extraction (Fast Loop) Probe, or a new M&C SP-2006Hg-T Mercury Probe. Not applicable to any other probe model or component.

** Amount of credit is based on replacement probe model. You may only apply a credit issued in respect of Eligible Probes towards the purchase of a Qualifying Probe if we receive such Eligible Probes within 60-days of shipment of the Qualifying Probe. We reserve the right to refuse any trade-in at any time for any reason.

*** "Eligible Probe" means the following: Thermo Scientific Model 83iGC-X or 83iGC-Y probes that are returned complete with used oxidizer and converter, in each case, that was purchased at any time.
