DATA SHEET

# HyPerforma 2:1 250 L Single-Use Bioreactor

# The next generation of performance

The Thermo Scientific<sup>™</sup> HyPerforma<sup>™</sup> Single-Use Bioreactor (S.U.B.) provides enhanced functionality, ease of use, and efficiency. The complete HyPerforma S.U.B. system consists of a bioreactor tank and Thermo Scientific<sup>™</sup> HyPerforma<sup>™</sup> S.U.B. BioProcess Container (BPC), which is available in 50, 100, 250, 500, 1,000, and 2,000 L sizes with a 2:1 turndown ratio. The redesigned HyPerforma S.U.B. maintains traditional stirred-tank bioreactor design principles, including specific height-to-diameter ratios and optimized mixer location that deliver optimum cell viability, performance, and scalability from process development through production.

This data sheet provides information on the 250 L S.U.B. system, which includes the tank and standard S.U.B. BPC. The BPC utilizes dual-sparger configurations with a porous-frit sparger and drilled-hole or open-pipe sparger that have been rigorously tested to provide high  $k_{\rm L}a$  values and optimal CO<sub>2</sub> stripping for improved pH control and decreased foaming.

# The S.U.B. system consists of the following components:

# S.U.B. hardware unit-available in turnkey format

- Complete mixing system with a choice of water jacket or resistive heater
- Drive shaft inserts into the S.U.B. BPC through the mixing drive motor and locks into the BPC agitator assembly

# S.U.B. BPC-supplied sterile and ready to use

- Agitator assembly is a single-use (polyethylene) impeller with a bearing-and-seal assembly linked to an external mixer drive
- Dual gas spargers available with either drilled-hole or open-pipe sparger and standard porous-frit sparger
- Vent filter outlet for system exhaust

- Integrally sealed ports in the S.U.B. BPC allow for addition of sensor probes and line sets
- Available in Thermo Scientific<sup>™</sup> CX5-14 Film and Thermo Scientific<sup>™</sup> Aegis<sup>™</sup> 5-14 Film options

# System options-adaptable to your needs

- Optional electrical box for remote agitation control
  - Temperature may be controlled remotely from electrical box on S.U.B.s with resistive heater\*
  - Water-jacketed S.U.B.s require a separate external temperature control unit
- Exhaust gas vent filter heaters
- Load cells (standard on 1,000 and 2,000 L S.U.B.s)
- Cable management tree
- Process control system
- See Table 12 for auxiliary components for S.U.B. control management; choose an open-architecture approach or a turnkey, ready-to-use Thermo Scientific S.U.B. system

\* For S.U.B.s with resistive heater, please discuss your process and heating requirements with our Field Application Specialist.

# Standard S.U.B. hardware units

The 250 L standard S.U.B. hardware units are available in the following configurations (Table 1).

- Water jacket with DC motor
- Water jacket with AC motor
- Resistive heater with DC motor
- Resistive heater with AC motor

Additional options are listed in Tables 3-7.

#### **Design features**

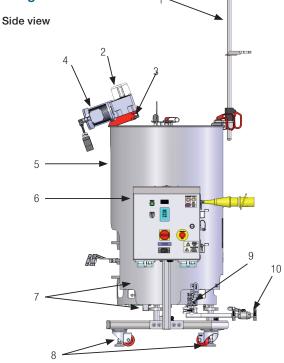

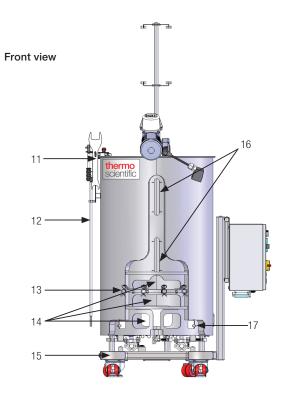

Figure 1. 250 L S.U.B. hardware unit with water jacket or resistive heater.

- 1. Exhaust vent filter holder
- 2. Mixing assembly with shield
- 3. Bearing port receiver with clamp
- 4. Mixer motor
- 5. Stainless steel (304) outer support container
- 6. Electrical control panel (optional)
- 7. Water jacket (3/8 in. dimpled) or resistive blanket (side and bottom)
- 8. Leveling casters
- 9. Bleed valve (water-jacketed models only)

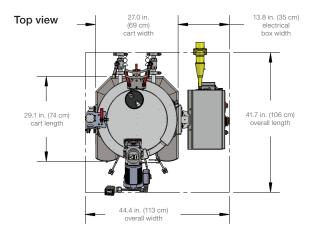

# Table 1. 250 L standard S.U.B. hardware unit with casters (leveling feet).

| Description                       | Cat. No.     |
|-----------------------------------|--------------|
| Resistive, DC motor               | SUB0250.9001 |
| Water jacketed, DC motor          | SUB0250.9002 |
| Resistive, 120 VAC, AC motor      | SUB0250.9003 |
| Water jacketed, 120 VAC, AC motor | SUB0250.9004 |
| Resistive, 240 VAC, AC motor      | SUB0250.9005 |
| Water jacketed, 240 VAC, AC motor | SUB0250.9006 |

- 10. Quick-connect water inlet/outlet ports (water-jacketed models only)
- 11. Standard tool set: 3/8 in. x 150 in.-lb square torque wrench; load cell and motor cap lockout wrench
- 12. Drive shaft (stored)
- 13. Probe hanger bracket
- 14. Probe access windows
- 15. Cart assembly
- 16. Liquid sight windows
- 17. Bottom cutouts/pins for BPC attachment and alignment

Note: Load cells are standard only on 1,000 and 2,000 L S.U.B. hardware units.

# System options

Table 3 lists available options for the 250 L S.U.B.

- Sparger support line (Figure 3)—keeps gas lines in an upright position for optimal gas transfer
- Heavy-duty tubing clamps (Figure 4)—used for each probe port not in use, eliminating process fluid holdup
- Sterile sampling manifolds—available in 50 and 100 mL size for off-line sample retention
- Load cells (Figure 5)—Mettler Toledo<sup>™</sup> FlexMount<sup>™</sup> load cells allow for reading of batch liquid weight; three load cells are mounted with summing box on the S.U.B. hardware unit
- **Bioreactor probe assemby (Figure 6)**—required for each sterile electrochemical probe insertion
- Autoclave tray (Figure 7)—aids in holding the probe assembly during the autoclave process
- S.U.B. temperature sample port (Figure 8) provides off-line temperature probe calibration prior to system startup
- Cable management tree (Figure 9)—allows the end user to organize the S.U.B. BPC tubing lines for operator ease of use

#### Table 3. 250 L S.U.B. system options.

| Description  | Cat. No.    |
|--|-------------|
| Cable management tree  | SV50992.02  |
| Load cell with summation box, without display  | SV50988.02  |
| Autoclave tray   | SV50177.01  |
| Bioreactor probe assembly (nonsterile for use in autoclave) with KPC connector                     | SH30720.01  |
| Bioreactor probe assembly (nonsterile for use in autoclave) with AseptiQuik <sup>™</sup> connector | SH30720.02  |
| Sparger line support   | SV50177B.19 |
| Heavy-duty tubing clamp (each)   | SV20664.01  |
| Heavy-duty tubing clamps (10 pack)   | SV20664.03  |
| Sterile sampling manifold with Luer lock (each)  | SH30845.01  |
| Sterile sampling manifold with Luer lock (10 pack)   | SH30845.02  |
| S.U.B. temperature/sample port   | SV20750.01  |

#### Additional information on autoclave tray:

- Fabricated from stainless steel
- Contains plastic carry handle for easy transport right out of the autoclave
- Positions probes on 15% incline for greater longevity
- Prevents probe bellows from collapsing during sterilization
- Accommodates two probes

Figure 8. S.U.B. temperature sample port.

Figure 9. Cable management tree.

#### Vent heaters

Vent heaters aid in reducing moisture buildup in exhaust filters from system off-gassing. Vent heaters are factory preset at 50°C to allow condensation to return to the vessel. Recommended gassing strategies of the S.U.B. system are in the S.U.B. Validation Guide. Table 4 lists available vent heaters.

# Table 4. Vent heater required for each exhaust filter on the S.U.B. BPC.

| Description  | Voltage | Controller | Cat. No.   |
|--|---------|------------|------------|
| Meissner <sup>™</sup> 10 in. series<br>46 vent filter heater                   | 120 VAC | Preset     | SV50191.33 |

| Pall Kleenpak KA3<br>series 46 vent filter<br>heater                           | 120 VAC | Integrated | SV50191.45 |
| Pall Kleenpak KA3<br>series 46 vent filter<br>heater                           | 240 VAC | Integrated | SV50191.46 |

# Harsh mount load cell display

Required for remote weight readout from the Mettler Toledo<sup>™</sup> summing box, various signal output options are provided for external control monitoring (Table 5). More information can be found in the Load Cell Data Sheet.

#### Table 5. Harsh mount load cell display options.

| Description  | Cat. No.    |
|--|-------------|
| Mettler Toledo IND331 display, with analog interface (STD), 120 VAC U.S. line cord/plug                      | SV50177.306 |
| Mettler Toledo IND331 display, with Allen-<br>Bradley RIO interface, 120 VAC U.S. line<br>cord/plug          | SV50177.307 |
| Mettler Toledo IND331 display, with DeviceNet interface, 120 VAC U.S. line cord/plug                         | SV50177.308 |
| Mettler Toledo IND331 display, with Ethernet/<br>IP and Modbus TCP interface, 120 VAC U.S.<br>line cord/plug | SV50177.309 |
| Mettler Toledo IND331 display, with Profibus interface, 120 VAC U.S. line cord/plug                          | SV50177.310 |

#### **Spare parts**

Table 6 lists the available spare parts of the 250 L S.U.B. systems.

#### Table 6. Available spare parts list.

| Description  | Cat. No.    |
|--|-------------|
| DC motor   | SV50237.07  |
| AC motor   | SV50237.16  |
| Drive shaft  | SV50177.35  |
| RTD 120 in. with Bulgin connector                          | SV50177.363 |
| Probe holders  | SV50177.23  |
| Autoclave tray (stainless steel with plastic carry handle) | SV50177.01  |
| Adjustable filter bracket                                  | SV50177.313 |

# Standard 250 L dual-sparger S.U.B. BPC systems

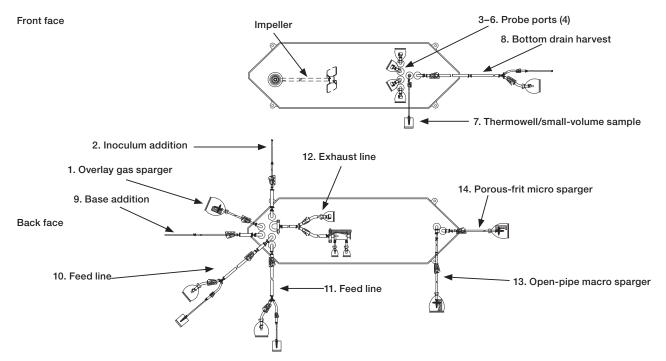

Table 7 shows the available dual-sparger options for the 250 L S.U.B. BPC system in either configuration: open-pipe and porous-frit spargers (Figure 10, Table 9) or drilled-hole and porous-frit spargers (Figure 11, Table 10). Standard S.U.B. BPC packaging is shown in Table 8.

#### Table 7. Standard 250 L dual-sparger S.U.B. BPCs.

| Film           | Dual sparger configuration            | Cat. No.   |
|----------------|---------------------------------------|------------|
| CX5-14 film    | Open-pipe and porous-frit spargers    | SH30774.03 |
| Aegis5-14 film | Open-pipe and porous-frit spargers    | SH30972.03 |
| CX5-14 film    | Drilled-hole and porous-frit spargers | SH30985.03 |
| Aegis5-14 film | Drilled-hole and porous-frit spargers | SH30999.03 |

#### Table 8. Standard 250 L S.U.B. BPC packaging.

| 14     | Porous-frit micro sparger<br>12 mm diameter<br>(25 µm pores)  | 1/4 in. (6.4 mm) x 7/16 in. (11.1 mm) C-Flex tubing x 6 in. (15 cm) reduced to check valve and 1/4 in. (6.4 mm) x 7/16 in. (11.1 mm) C-Flex tubing x 56 in. (142 cm)   | Meissner Steridyne 0.2 µm<br>hydrophobic filter connected to<br>6 in. (15 cm) C-Flex tubing   |

# Custom S.U.B. BPC options

Table 11 lists available custom 250 L S.U.B. BPC system options. Not all options are available for all ports. For additional information, please see the selection guides in the single-use products catalog.

#### Table 11. Custom 250 L S.U.B. BPC options.

| Category                                    | Options/capability  | Notes  |  |
|---|---|--|--|
| Tubing type                                 | Thermoplastic elastomers: C-Flex, PharMed <sup>™</sup> ,<br>PharmaPure <sup>™</sup> tubing<br>Platinum-cured silicone<br>PVC                          | More information is available in the Tubing Selection Guide  |  |
| Tubing size                                 | Ranging from 1/8 to 1 in. (0.318 to 2.54 cm) ID, in customer-specified lengths  | More information is available in the Tubing Selection Guide  |  |
| Connectors                                  | Luers, quick connects, SIP connectors, tri-clamp, aseptic<br>connectors, sterile connectors, steam-to, steam-through,<br>sample ports, plugs          | More information is available in the<br>Connector Selection Guide. Note:<br>Reusable probe port connections use<br>Kleenpak connector only |  |
| Probe ports                                 | Additional ports: second row of four  | The reusable probe port connection uses a Kleenpak connector only  |  |
| Disposable sensors                          | Pressure sensor: PendoTECH and Finesse Solutions<br>DO and pH: Finesse Solutions and PreSens<br>pH: Mettler Toledo                                    | Choice of qualified sensors available  |  |
| Additional probe ports                      | Limited engineer-to-order customization only  | Qualified location on second row of probe ports only   |  |
| Port sizes                                  | Limited engineer-to-order customization only  | Dependent on location in BPC and fit with<br>hardware (e.g., 1 in. (2.54 cm) port on<br>harvest line)                                      |  |
| Rearrangement of lines<br>on existing ports | Limited customization possible (e.g., moving sample/<br>thermowell port to a probe tube port, or swapping overlay<br>inlet line with supplement line) | Dependent on location in BPC and fit with hardware   |  |
| Sparger                                     | Dual sparger (macro open-pipe or drilled-hole and micro porous-frit) standard   | Sparger locations are fixed  |  |
| Diptube lines                               | Limited customization possible  | Length cannot interfere with impeller and shaft  |  |
| Overlay and sparger line filters            | Filter options available from standard component library  | Choice of qualified filters available  |  |
| Vent filters                                | Standard is Pall or Meissner 0.2 $\mu m$ exhaust vent filter  | Filters must be compatible with available vent filter heater configurations  |  |
| Vent filter tubing length                   | Extended filter height above the S.U.B. BPC is made to order  | Must be compatible with a vent filter bracket option   |  |
| Filters on media and supplement inlets      | Limited engineer-to-order customization only; choice of filters used to sterilize incoming media or supplements are available                         | Choice of qualified filters available  |  |

#### Table 12. Recommended S.U.B. parts list for first-time operators.

| Description   |   | Cat. No./auxiliary part        |  |  |
|---|---|--------------------------------|--|--|
| S.U.B. hardware unit  |   | Type to be configured          |  |  |
| S.U.B. BPC  |   | Type to be configured          |  |  |
| Bioreactor probe assembly (nonsterile for use in autoclave)   |   | SH30720.01                     |  |  |
| Heavy-duty tubing clamp   |   | SV20664.01                     |  |  |
| Autoclave tray for autoclaving probe assemblies   | 1 | SV50177.01                     |  |  |
| Auxiliary parts supporting the single-use bioreactor<br>(supplied by end user or requested turnkey) |   |                                |  |  |
| Necessary for gas flow control, DO, and pH set points   |   | Bioreactor control system      |  |  |
| Autoclavable probe (13 mm x 13.5 PG thread with 195–235 mm insertion length)                        | * | DO probe                       |  |  |
| Autoclavable probe (13 mm x 13.5 PG thread with 195–235 mm insertion length)                        | * | pH probe                       |  |  |
| Tubing welder, steam-in-place system, sterilizer, or laminar flow hood                              | * | Sterile/aseptic connection     |  |  |
| Used for fluid transfer between linesets on the containers  | * | Stand-alone peristaltic pump   |  |  |
| Necessary for water jacket temperature controls (not provided)                                      | * | Temperature control unit (TCU) |  |  |
| <sup>r</sup> Quantity based on needs.   |   |                                |  |  |

Quantity based on needs.

# **External controller options**

The HyPerforma S.U.B. offers an open-architecture or turnkey system. An open-architecture system allows you to use any control system of your choice. The capital investment can be reduced by using a control system already utilized in your facility. A turnkey system is a readyto-use, out-of-the-box system with a choice of dedicated controls from Finesse Solutions or Applikon. These systems work on PC, DeltaV, Allen-Bradley, or Siemens formats. Contact your local sales representative for more information.
