

Certificate of Analysis

RiboMinus™ Eukaryote Kit for RNA–Seq

Product No. A10837–08

Lot No. 1691097

Date of Manufacture 01Apr2015

The RiboMinus™ Eukaryote Kit for RNA–Seq is functionally tested for optimum performance using the following tests:

Total RNA Assay

Analysis of the molecular size distribution of RNA from depleted samples must show 18S and 28S ribosomal RNA depletion of 95% (\pm 5%) as compared to non–depleted samples.

Results: Meets specification.

Gel Electrophoresis

The depleted RNA sample is analyzed by gel eletrophoresis. By visual inspection, no 18S and 28S ribosomal RNA must be present in the depleted samples.

Results: Meets specification.

For Research Use Only. Not for use in diagnostic procedures. If you have any further questions about this Certificate of Analysis, please contact Technical Services at 1–800–955–6288 (US and Canada) or 1–760–603–7200, x2 (all other countries).
