

Certificate of Analysis

CD44 Rat anti-human/mouse mAb, AlexaFluor® 488 Conjugate, 200 µL

invitrogen
by Thermo Fisher Scientific

Combo Kit Part Number: A25528 denotes antibody and FluoroBrite™ DMEM

Part Number: A25527 Antibody Part Number

Lot Number: 2013038A

Immediate Storage: 4°C

Shipping Conditions: blue ice

5781 Van Allen Way

Storage and Handling:

If properly stored and handled, this product is guaranteed for 6 months from date of purchase.

Centrifuge conjugated antibody solutions for 2 minutes at 10,000 x g and add only the supernatant to the Blocking Solution. This step eliminates any antibody aggregates that may have formed during storage, thereby reducing non-specific background staining.

Storage Buffer:

50X antibody solution in HEPES buffered saline (137 mM NaCl, 2.7 mM KCl, 10 mM HEPES pH 7.5)

QUALITY ASSURANCE

This conjugated antibody is specially formulated and sterile-filtered to meet the demands of live-cell imaging applications: it contains no cytotoxic preservatives (e.g., no sodium azide) and is tested to ensure that endotoxin levels are low and that it is free of microbial contaminants.

Anita Targosz, Carlsbad - Engineer, QA
