

March 7, 2024

Subject: Thermo Scientific™ Sensititre™ YeastOne™ Product Discontinuation

Dear Customer,

To continue to provide your lab with the latest antimicrobials to meet your testing needs, while also improving our service levels, we have made the decision to discontinue the following products, effective June 1, 2024:

Product Number	Product Description
YO9	Sensititre YeastOne Plate - RUO
YO2IVD	Sensititre YeastOne Plate - IVD
YO3IVD	Sensititre YeastOne Plate - IVD

Any new orders placed for the above products as of March 7, 2024 will incur an additional 6 week lead time to be fulfilled. Existing orders will be fulfilled through the normal process but may experience order fulfillment delays. We will continue to accept orders for YO9, YO2IVD and YO3IVD until April 8, 2024. No orders will be accepted after that date. To avoid workflow disruption, please transition to the new plates, available now, that include Rezafungin and meet the latest FDA STIC requirement.

Product Number	Product Description
YO11	Sensititre YeastOne Plate - RUO
YO4IVD	Sensititre YeastOne Plate - IVD

If there are questions regarding this update, please contact your Thermo Fisher Scientific account manager or reach out to the Customer Services team at 800-255-6730 or the technical support team at USCLEtechsupport@thermofisher.com.

Sincerely,

Amanda Kulwicki
