

Testing in-house now makes financial sense

Expand your beer analysis

You take pride in the quality of your beer. As your brewery grows, so will your analytical testing needs. The Thermo Scientific™ BeerCraft™ Software for use with the Thermo Scientific™ GENESYS™ 50 or GENESYS™ 150 UV-Vis Spectrophotometers, helps you ensure batch-to-batch consistency to maintain your beer's identity and the success of your brand.

Financial services – our advantage

For many craft brewing businesses, achieving operational efficiency while maintaining cash flow is a challenge. Typically, craft breweries maintain the quality of their brew by sending samples to external testing laboratories. This process can take weeks and can be expensive. What if you could bring testing in-house and at the same time achieve flexibility?

Learn more about our financing programs to invest confidently so you can:

- Preserve your working capital
- Lower your initial capital investment
- Optimize your cash resources
