

It's time to upgrade Special offer

for Thermo Scientific™ HAAKE™ MARS™ II* rheometer owners. Upgrade to our latest MARS rheometer series, and get up to 25% off, plus bring new advantages to your lab.

Faster results with simplified operation

Enjoy easy access for sample preparation, plus reduce errors and optimize your workflow with "Connect Assist" technology which automatically recognizes geometries, provides immediate feedback and offers push-button geometry release.

New insights into rheological property changes

Determine what drives changes in the rheological properties of your samples by combining the HAAKE MARS rheometer's powerful macroscopic analysis with information about what's happening on the microscopic level.

Extended measuring capabilities

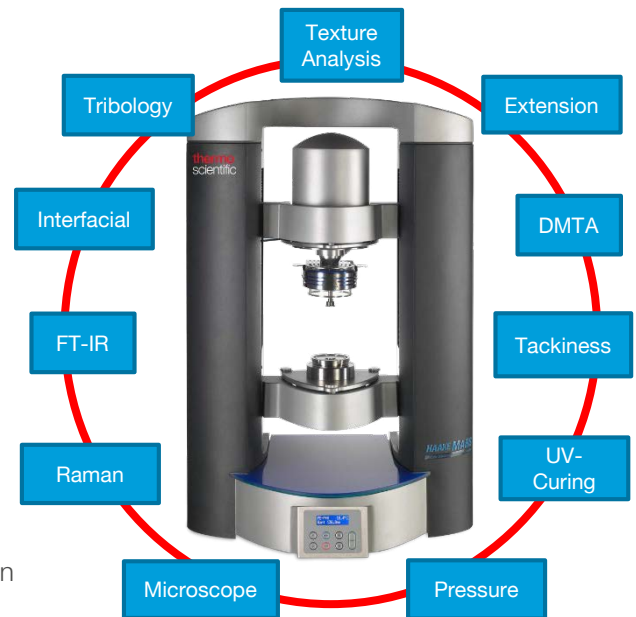

The lower torque range of the HAAKE MARS 60 rheometer is beneficial for sensitive measurements or for interfacial analysis. The high shear option is also part of the standard configuration.

Reliable software capabilities

Staying with the Thermo Scientific™ HAAKE™ RheoWin™ software platform, ensures a smooth transition. Advance your standard operating procedures (SOPs) with automatic user guidance and customized SOP creation including video and photo integration with HAAKE RheoWin software.

Long-term planning security

Starting January 2019 only limited repair and service of your HAAKE MARS II rheometer will be available. Upgrade to ensure continued operations in your daily research or QC environment. Benefit from new capabilities and truly significant financial savings.

Save
20% on HAAKE MARS 40
25% on HAAKE MARS 60

Valid on the following items

- HAAKE MARS rheometer series including HAAKE RheoWin measuring and evaluation software, with free software updates
- Temperature control modules: Peltier, electrical or liquid
- Standard measuring geometries lower & upper plates, cones and coaxial cylinder
