

Agilent 4150 TapeStation System for One Lambda™ Devyser Accept cfDNA Workflow

Streamline your DNA analysis with the innovative TapeStation System. This advanced solution offers a range of features and benefits to help enhance your research and capabilities.

Key features and benefits

- Experience the power that efficient QC (high-resolution electrophoresis combined with automated sample and data analysis) can have on your cfDNA workflow
- Agilent's team of experts will help ensure an easy installation process and provide service and support* to optimize your workflow and maximize efficiency
- Once installed, enjoy peace of mind with a 1-year warranty* (options available to extend the warranty) provided by Agilent

Financial Flexibility

Please reach out to your One Lambda Sales Representative to discuss purchase options tailored to your specific requirements.

Reagents

Additional reagents need to be procured directly from Agilent. This helps to ensure compatibility and optimized performance for your Agilent TapeStation System.

4150 Tape Station Reagents and Consumables for Devyser cfDNA Assay

Part Number	Reg Status	Description
5067-5631	RUO	Cell-free DNA Reagents (Reagents pack comes with the Ladder and Sample Buffer)
5067-5632	RUO	Cell-free DNA Ladder
5067-5633	RUO	Cell-free DNA Sample Buffer
401425	General Use	Optical Tube Strip Caps (8x Strip) - 1 box of 120
401428	General Use	Optical Tube Strips (8x Strip) - 1 box of 120
5067-5598	General Use	Loading Tips (112 Tips per Pack), 1 Pk
5067-5599	General Use	Loading Tips (112 Tips per Pack), 10 Pk
